

RASHMI RANJAN PANDA

 **Software Engineer**

rrashmipanda2400@gmail.com | 8328841045 | Odisha, Baleswar

PROFESSIONAL SUMMARY

Fullstack Developer with 2+ years of experience building web applications using Next.js, React, and Node.js. I specialize in developing robust backends with Python and TypeScript, while managing deployments using Docker and AWS.

WORK EXPERIENCE

Software Engineer

Jan 2026 – Present

CoForce

- Currently Building a multi-tenant quotation system with Next.js and Node.js, featuring complex role-based access for organizations, managers, and sales teams. Focused on developing robust backends with Express and TypeScript while managing scalable deployments using Docker and AWS.
- Implemented secure payment integration using Razorpay API, including order creation, webhook handling, and transaction verification.
- Deployed and managed applications on AWS ensuring high availability and scalability

fullstack developer

Dec 2024 – Dec 2025

Hids Technologies

- Developed and maintained Learning Management System (LMS) and Webinar platforms using Next.js, TypeScript, Express.js, and MongoDB with modular and scalable architecture.
- Engineered backend systems for Youngink Magazine and various Workshop projects using Node.js and Express to handle core business logic and data management.

Frontend Developer

May 2023 – Oct 2024

Nucigent Technology Pvt. Ltd.

- I've worked on several projects, including web application for ticket-manage-system, e-commerce platform
- Worked closely with the design team to ensure the UI was pixel-perfect and the backend team to integration
- Challenge I faced was optimizing the page load time, which I achieved by implementing lazy loading and code splitting

EDUCATION

Master of Computer Applications

Trident Academy Of Technology,
Bhubaneswar, Odisha

- Final CGPA: 8.1

Sept 2021 – July 2023

Bachelor of Science

Fakir Mohan University, Balasore, Odisha

- Final CGPA: 7.69

Jan 2017 – Dec 2020

SKILLS

- ReactJs, next js, Tailwind, gsap
- NodeJs, ExpressJs, Typescript
- Python, Fastapi, Aws, Docker
- Database : MongoDB, Sql
- Developer Tools : VS Code, Postman, Git, GitHub
