EDUCATION

Trident Academy Of Technology, Bhubaneswar, Odisha

2021 - 2023

Master of Computer Applications

CGPA/Aggregate: 8 .1

Fakir Mohan University, Balasore, Odisha

2017 - 2020

Bachelor of Science

CGPA/Aggregate: 7.69

EXPERIENCE

fullstack developer

may 2025 – present

Hids Technologies

Pune, India

- Developed and maintained **Learning Management System (LMS)** and **Webinar platforms** using **Next.js**, **TypeScript**, **Express.js**, and **MongoDB** with modular and scalable architecture.
- Implemented **secure payment integration** using **Razorpay API**, including order creation, webhook handling, and transaction verification.
- Deployed and managed applications on **AWS** ensuring **high availability and scalability**.

frontend developer

march 2024 – nov 2024

CCG TECHNOLOGIES INDIA PVT LTD

remote

- I've worked on several projects, including web application for ticket-manage-system,e-commerce platform
- worked closely with the design team to ensure the UI was pixel-perfect and the backend team to integration.
- challenge I faced was optimizing the page load time, which I achieved by implementing lazy loading and code splitting

PROJECTS

pmp | *Node js, Express, Typescript, Mongodb*

Github

- Pmp is a RESTful API service designed to support collaborative project management. The system enables teams to organize projects, manage tasks with subtasks, maintain project notes, and handle user authentication with role-based access control.
- Built **user authentication and authorization** using **JWT tokens** with support for Admin, Project Admin, and Member roles.
- Integrated **email verification** and **password reset flows** using secure token-based authentication. .
- Implemented **task workflow tracking** (Todo → In Progress → Done) and **file attachment handling** using Multer and MongoDB GridFS.

Himation.in | *React, Tailwind,gsap,Typescript* Live

- Independently designed and developed the **company's official product website** for AR/VR headsets using **React (Vite)** and **Tailwind CSS** for a fast, responsive UI.
- Implemented **immersive product showcase animations** and **scroll-based interactions** using **GSAP** and React hooks for a dynamic user experience.
- Built a **modular, reusable component structure** with **React Router** for smooth navigation across product and info pages

TECHNICAL SKILLS

Frontend : HTML, CSS, JavaScript, ReactJs, Bootstrap, Tailwind ,next js, gsap

Backend : NodeJs, ExpressJs,Typescript

Database : MongoDB

Developer Tools : VS Code, Postman, Git, GitHub
